Uzbekistan

Steer Ref. 23793601

Dear Jamshid

Letter of Recommendation

I am happy to recommend the excellent services of TRUE Engineering. TRUE Engineering were contracted by Steer for the Uzbekistan Regional Airports PPP study which was commissioned by The World Bank. The purpose of the study was to explore options to attract private sector financing and expertise into the rehabilitation, expansion and operations of Tashkent Airport and nine regional airports (Urgench, Bukhara, Nukus, Fergana, Namangan, Termez, Navoi, Andizhan and Karshi) in Uzbekistan.

TRUE Engineering's role involved undertaking site visits to assess and record the characteristics and condition of the airport assets and facilities for each of the ten airports involved in the study. Additionally, TRUE Engineering undertook interviews with airport personnel to aid with the data collection related to the asset condition. TRUE Engineering also provided English to Russian translation services.

TRUE Engineering were professional, organised and responded quickly to requests. They mobilised quickly for the site visits and provide very detailed reports of the facilities and assets at each airport, including providing photographs of the assets and additional documentation that have received from the management teams at the airports.

We are very satisfied with the services that TRUE Engineering have provided.

Yours sincerely

Matt Bull
Associate Director
